Veishea

The theme of the 1985 Forestry Veishea display was "What Is Forestry?" It attempted to explain the major aspects of Forestry in an interesting and uncomplicated way.

The display contained small, informational displays about various aspects of forest resource management, forest products, and recreation. The new cable logging model and computer simulation of management were popular. The traditional seeding give-away, visits by Smokey the Bear and Woodsy Owl, and displays by forestry student organizations were also included.
